# PT SERIES

## Water Treatment Systems

## Problem Water?

Your PT Series water-treatment specialists can assist you in selecting a complete PT Series home water-treatment system to solve and eliminate water problems affecting taste, odor, and appearance, such as:

- Hardness
- pH imbalance (corrosion)
- Turbidity (sediment and particles)
- Color
- Iron
- Hydrogen sulfide (rotten egg smell)
- Tannins

For a water analysis and more information on the PT line of water conditioners, filters, reverse osmosis drinking-water systems and cartridge filter systems, call you local PT Series water-treatment specialist.

Would you own a home without a front door? After all, your door is the barrier that keeps out bad weather, dust, and other undesirable elements. So why let hard, impure, water enter your home?

Protect your home and your family with PT Series water treatment. Soft water can help protect your wallet, your pipes, your appliances, your fixtures, your laundry, your hair, and your skin. Reverse-osmosis water provides clean, healthy water for you and your family.

PT Series quality water systems are your family's front line of protection against hardness elements, iron, rust, sediment, and a variety of other substances that may be present in your source water before it enters your home. Hard water is the main culprit, affecting everything from the functionality of your plumbing to the softness of your clothes and the taste of your drinking water.

From the kitchen to the bathroom, to the laundry room, to your basement or garage, PT Series systems enhance the quality of water throughout your home. By reducing hard water, mineral build-up, and a variety of substances; PT Series systems refine the lifeblood of your home. From the way your skin feels after showering to the performance of your appliances and the taste of your drinking water, enhancing the quality of your water enhances the quality of your life.

## A Healthier, Cleaner Kitchen

- Dishes and china are cleaner, and glasses and crystal are spotless
- Fresher, natural flavors when cooking, boiling, and steaming
- Bottled water costs are replaced by economic water filtration
- Enjoy great-tasting drinking water, coffee, juice, soup, and ice, with your complete PT Series drinking-water system

Get spotless dishes and glasses, fresher flavors, and healthier drinking water with PT Series systems.

## Softer, Cleaner Laundry

- Clothes and towels get brighter and whiter using less detergent
- Washing machines last longer with less mineral scaling
- Sheets and clothes get cleaner, fresher, softer, and last longer
- Cleaner and chemical costs are reduced up to 75%

PT Series soft water produces clean, soft clothes with less soap.

## Efficient Plumbing & Appliances

Reduced soap scum means quicker cleaning, while reduced scale means better efficiency in your drains, pipes, and water-heater.

- PT Series soft water reduces hardness buildup and clogging in piping and drains
- Maintain high efficiency in your water heater
- Dishwasher and laundry diaphragms corrode less—saving you money on maintenance
- Toilets and sinks do not experience “hardness-block”

## Cleaner, More Pleasant Bathrooms

- Skin feels smoother after baths, showers, shaves, and hand washing
- Hair is softer, radiant, and more manageable after shampoos
- Reduced soap scum and residue makes cleaning easier at your shower, tub and sink
- Mineral staining and discoloring is reduced

Use less shampoo and soap to get shiny, manageable hair and soft skin. Use less time and chemicals to clean.
